Micro-Core® Cooling & Heating System

The Climate Wizard™. The future of air conditioning.

Harness the *power* of nature.

At Seeley, we harness the power of nature.

The Climate Wizard CW3 with Micro-Core air conditioning technology has been inspired by nature with beautiful design, incredible reliability and unsurpassed cooling performance using 100% fresh outside air - the only air to breathe!

Today, you can harness that power too.

Seeley International is renowned for world-class design and innovation, striking that delicate balance between form and function, just like nature. The Climate Wizard CW3 Dual System is like no other air conditioning system. Cooling comfort that rivals refrigerated systems without the running costs, using a 100% all-natural refrigerant that doesn't warm the planet. Intelligently, packaged with our gas heating unit through one set of ducts and one controller.

Since day one, over 50 years ago, our company has been about challenging mindsets and stretching the imagination. Trust, reliability and innovation have been the cornerstones to success. It's no coincidence that Seeley International is the **most awarded** air conditioning manufacturer in Australia, and we export our amazing products all around the globe.

At Seeley International, we don't settle for ordinary, and neither should you.

Frank Seeley

AM, DUniv Flin, FAICD
Founder and Executive Chairman

The *best* air conditioning technology on the planet for the planet!

We are all looking to live a more sustainable life and create a more eco-friendly future for ourselves and our families.

The idea of living the everyday in a way that reduces your carbon footprint, utilising renewable resources and eliminating the depletion of natural resources is our goal.

Traditional refrigerated reverse cycle air conditioning systems are typically in contrast to this ideology, due to their high energy demand, particularly in extremely hot weather, and their use of environmentally harmful refrigerants that are rated as having medium to high global warming potential (GWP). Combined with the knowledge that traditional methods used for cooling, heating and ventilation account for around 40% of total energy consumption in a household², it is even more critical that we use hyper-efficient and sustainable air conditioning systems in Australia and around the world.

Introducing The Climate Wizard CW3, the world's most advanced dual system for a sustainable future.

2. Source: <https://www.yourhome.gov.au/energy/heating-and-cooling>

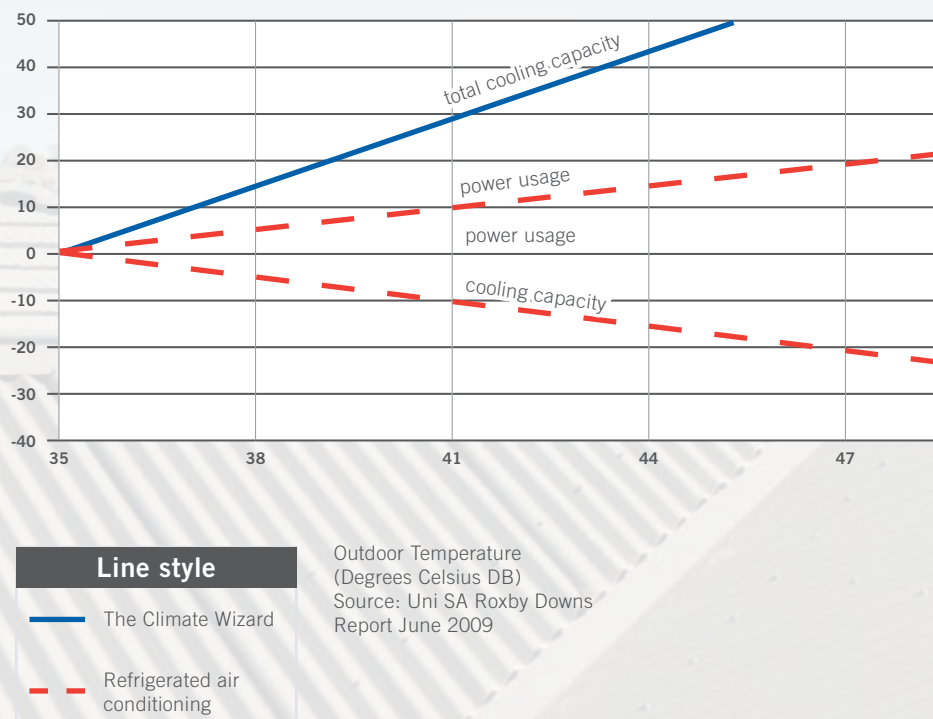

Performance comparison vs reverse cycle

The Climate Wizard CW3's, cooling performance rivals and at times out performs refrigerated systems, while using as little as only 20% of the energy.

While refrigerated systems significantly increase power use as outdoor temperatures rise, the Climate Wizard CW3 has constant power consumption, even when outdoor temperatures soar.

This means that the cost saving capabilities actually increase during heat waves. This is in complete contrast to refrigerated systems.

The Climate Wizard CW3 compared to refrigerated cooling as temperature rises.

The very *latest* in home comfort technology.

What is The Climate Wizard CW3?

The Climate Wizard CW3 is unique. It delivers convenient cooling, remarkable energy-efficiency, automated year-round indoor air comfort, with superb functional and sustainable design.

The Climate Wizard CW3 can be installed in two ways:

1. either as a combined dual system, the cooling unit is paired with a separate gas heater, or
2. as a stand-alone hyper-efficient cooling only solution;

for homeowners wanting next generation energy-efficiency.

Using the cutting-edge and patented Micro-Core heat exchange technology to provide hyper-efficient cooling of outside air, the Climate Wizard CW3 greatly reduces energy consumption compared to equivalent refrigerated systems, while always delivering 100% fresh air.

When combined with a gas heating unit in the roof space, the Climate Wizard CW3 Dual System delivers warm air through the same ducts and into the home via the same small vents in the ceiling – making the system much less visible and much more cost effective to run.

"this system is using less energy than other systems in the marketplace"

**Nathan – Vogue Constructions
Canberra, ACT**

"it offers that next generation of sustainable comfort and living"

**Emma-Jane – Homeowner
Canberra, ACT**

Find out more about
The Climate Wizard CW3

Micro-Core heat exchange technology, the secret to *hyper-efficient* cooling.

The outdoor Climate Wizard CW3 cooling unit is positioned on the roof, delivering cool, fresh air through ducts into the home via small vents in the ceiling.

Warm air and any airborne particles can be expelled out of the home through an air relief vent into the ceiling space, and is released to the atmosphere through the roof space, which means you can activate the system remotely while the house remains locked up. Alternatively, windows and doors can be opened to release the warm air and particles – it's your choice.

The cooling system replaces the air inside your home with 100% fresh cool air up to 10 times an hour.

Micro-Core cooling

Made up of the primary heat exchanger and secondary cooling stage to deliver cool temperatures equivalent or better than refrigerated reverse cycle at a fraction of the cost.

Delivers *unrivalled* energy-efficiency

Evoenergy Smart Home Project, Canberra

The Climate Wizard CW3 Dual System delivers up to a 60% reduction in energy costs compared to ducted reverse cycle for total cooling and heating. For cooling only, the CW3 delivers up to 80% reduction in energy costs compared to ducted reverse cycle¹.

Even more staggering is its resilience to weather extremes, the Climate Wizard CW3's absolute cooling performance actually gets better as the outside temperature rises³. That's in direct contrast to refrigerated air conditioners, where cooling capacity can be significantly reduced when outside temperature starts to soar.

100% fresh cold air for good health and well-being

The Climate Wizard CW3 cooling unit continually replaces stale air with 100% fresh, healthy, filtered air, whereas reverse cycle systems rely on the recirculation of breathed air, with closed windows and doors, to deliver cooling efficiency that is still dramatically less than Micro-Core technology.

The Climate Wizard CW3 Micro-Core heat exchange technology delivers 100% filtered fresh air continuously in cooling mode. This clears away indoor pollutants and airborne particles while achieving cooling temperatures that could previously only be achieved by reverse cycle systems operating in non-heatwave conditions.

for the **ultimate** in sustainable living.

Comfortable indoor air

This clever technology delivers the perfect balance regardless of whether it's operating in humid or dry climates. Whether you prefer summer or winter, you will always have comfortable indoor air in your home that does not dry out your eyes or skin, as its unique design delivers the perfect amount of moisture in the air, not too humid and not too dry! This is what makes the Climate Wizard CW3 stand out in its own class compared to reverse cycle or evaporative systems.

Lower carbon emissions

The Climate Wizard CW3 Dual System makes low carbon living easier, as it uses up to 80% less power than ducted reverse cycle when in cooling mode.

Responsible use of renewable resources

Unlike reverse cycle air conditioning that relies on refrigerant gases with high global warming potential (GWP), The Climate Wizard CW3 with Micro-Core technology uses the most environmentally friendly refrigerant on the planet – water!

1. Compared to reverse cycle air conditioning. Seeley International's calculation, based on publicly sourced running cost figures.
3. For every 10°C that the ambient temperature increases, the supply air temperature only increases by approximately 1°C.

Heat your *whole* home.

Fully integrated system. 365 days of comfort.

Hydrogen ready⁴ gas heating.

The ultimate in energy efficient heating.

The gas heating indoor unit is positioned within the roof space.

Warm air is delivered through the same ducts and into the home via the same small vents in the ceiling, making the system less visible and more cost effective to install and run.

3 to 7 star equivalent efficiency rating options available.⁵

4. Seeley International gas appliances at point of manufacture date, will comply with all relevant Australian Regulatory Standards, for use of current industry approved hydrogen/natural gas blends at that time.

5. Star rating equivalent. Based on Australian Gas Association's results calculated in accordance with the testing methodology in AS/NZS5263.1.6:2020

Renewable, clean, green hydrogen. The future of home heating.

Australians love natural gas. Almost half of all household energy in Australia is provided by gas⁶. It's a reliable, cost-effective energy for the appliances we use for cooking, heating and hot water. The great news is there are changes afoot with plans to rollout green hydrogen into the supply chain to households.

When used as a fuel, hydrogen's only by-product is water. This flexible, safe and storable fuel can be used to blend with or replace natural gas to heat homes and for cooking. It produces no carbon emissions when used as a fuel.

Hydrogen is also hugely versatile and has many other uses in industry and transport, all of which will bring us closer to a net zero emissions future, right here in Australia.

What's exciting is that hydrogen blended with natural gas is the first step to this zero emissions future in Australia and it is currently being trialled in selected communities across Australia by leading gas suppliers. Importantly it will be rolled out into various gas networks within the next 5 to 10 years.

At Seeley International, we have been working with leading industry authorities to ensure our gas heating products are "hydrogen-ready", to perform at their best using hydrogen blends to provide the same cosy warmth and whole of home comfort that millions of Australians expect and have been experiencing every winter with Braemar for generations.

So, when clean and green, renewable hydrogen gas blends are available in your neighbourhood in the near future, you can be assured that your Braemar gas heating system will perform at its best and is compliant with all Australian Safety Standards and regulations⁷.

7. Seeley International gas appliances at point of manufacture date, will comply with all relevant Australian Regulatory Standards, for use of current industry approved hydrogen/natural gas blends at that time.

Harness the *simplicity* of **MAGIQTOUCH®** controller

Touch screen technology

Smart, sophisticated and incredibly intuitive, your MagIQtouch controller makes operating your Climate Wizard CW3 and Braemar ducted gas heating system so simple. Control the temperature, fan speed and many more features on a user-friendly touch screen.

Main features

Touch screen functionality

All functions and operations are only a touch away with the easily navigated interface.

Program mode

Programmable 7 day, 4 time period program, customisable to suit your lifestyle (including a temporary over-ride function).

Zone your home

Switch between zones in your home and control the settings in each zone.

Save on running costs by switching zones off⁹.

Useful settings

Access features such as child lock, quiet mode⁸ and servicing information.

Stylish design

Sleek screen styling to suit any home décor.

Switch to heating

Quickly switch to heating (where applicable).

OPTIONAL EXTRA

MagIQtouch Air Sensor

The MagIQtouch air sensor monitors temperature and humidity levels. It allows you to mount your MagIQtouch controller in the most convenient place in your home, as the MagIQtouch air sensor will then take over temperature control from the MagIQtouch controller. This can then be located in the best place in the house to ensure ultimate cooling comfort for everyone.

Harness the *power* of **Wi-Fi** and wireless

Controller upgrade options

If you choose a MagIQtouch controller, you receive a touch screen that is hard-wired into your home, fixed to your wall, where it best suits your needs. This model of MagIQtouch controller can be upgraded to a Wi-Fi enabled touch screen.

Option 1

Wi-Fi enabled touch screen:

- Take complete control of your comfort at home, at all times.
- Upgrade to a Wi-Fi module (sold separately) to work with your hard-wired MagIQtouch controller¹⁰ enabling you to control your cooling and heating directly from your personal device through our smart app.
- The MagIQtouch smart app¹¹ is available on Android and iOS devices.

Available for download now on iOS and Android

Option 2

Unable to have a hard-wired controller? No problem. MagIQtouch also has a wireless touch screen option.

Wireless touch screen:

- Battery operated wireless controller using Radio Frequency (RF) technology.
- Ideal for renovations, or where access for cabling is limited.
- Easier to install, the RF option can operate with up to 2 primary controllers.
- Can control the entire system from 2 locations rather than 1; an ideal solution for larger, or two storey homes.

8. TQ3 and TQD3 models: night quiet mode and zoning is not available, and fan speed is not user-adjustable.

9. Zoning is an optional extra.

10. MagIQtouch Wi-Fi module is not compatible with MagIQtouch wireless controller. Existing installations including a MagIQtouch controller may need to be upgraded if purchasing the Wi-Fi module. Additional costs may apply.

11. Requires MagIQtouch wall controller, MagIQtouch Wi-Fi smart kit and MagIQtouch account to operate. Additional costs may apply.

Australian *designed, made*
and **owned!**

Bruce - Production Operator

Built by Australians, for the harsh Australian climate

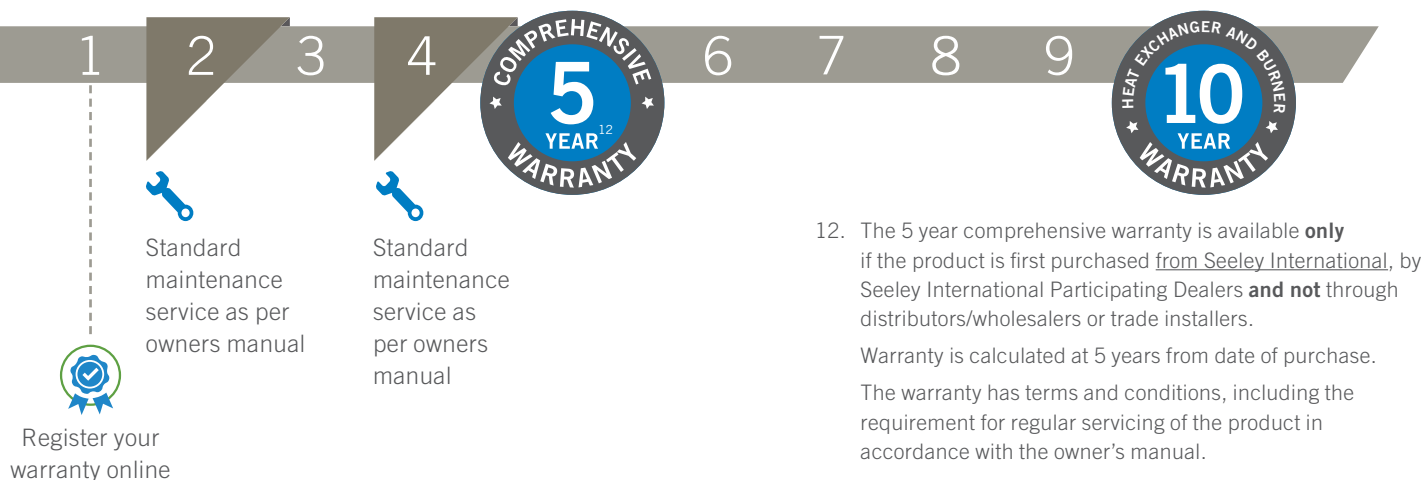

Seeley International is proudly a 100% Australian owned company, designing and manufacturing world-leading air conditioning products for Australia and the world. As Australia's largest air conditioning manufacturer, we are a global leader in developing ingenious, energy-efficient cooling and heating products. Being made in Australia, you can rely on build quality, longevity and the availability of parts and after sales service, for many years to come. We're extremely passionate, and dedicated to strengthening the Australian economy, supporting local employment and building on the skills of our workforce.

Warranty terms

The Climate Wizard CW3 Dual System

The Climate Wizard CW3 unit and Braemar ducted gas heaters are Australian made, using premium grade materials and supported by a comprehensive factory-backed 5 year Comprehensive Warranty¹², 10 year cover on all structural components, plus a hefty 25 year cover against corrosion, on its Permatuf® cabinet. While our engineering and quality control procedures mean we don't think you'll ever need to use it, our warranty is there for your protection and peace of mind.

5 Year Warranty – Climate Wizard and Braemar

IMPORTANT

Remember to always use qualified, licensed installers who have been trained to install the Climate Wizard CW3. While Seeley International stands by its product quality, a poorly installed product may not operate properly and can even be dangerous, so be sure to buy your product from a reputable dealer (visit seeleyinternational.com or to find a dealer) and make sure your installer is fully qualified and trained.
