

Become a Seeley International partner

Join Seeley International on our mission to deliver innovative, sustainable climate control solutions to the world.

Why choose Seeley International?

Our vision is

"To lead the world in creating climate control solutions which continue to be highly innovative, of premium quality, and inspirational in their delivery of energy efficiency"

Jon Seeley Group Managing Director

Frank Seeley AM, DUniv *Flin*, FAICD Founder and Executive Chairman

World-leading Climate Control solutions

Australia's largest air conditioning manufacturer and a global leader in the development of ingenious, energy efficient cooling products for commercial and industrial markets.

FOUNDED IN 1972

headquartered in Adelaide

NEXT GENERATION MANUFACTURING CAPABILITY manufacturing in Australia and USA

GLOBAL PRESENCE exporting to over 100 countries

DEDICATED LOCAL SUPPORT with more than 400 employees around the world

STRONG R&D FOCUSED ON ENERGY EFFICIENCY peak demand reduction, extreme climate capability

GREEN TECHNOLOGY no chemical refrigerants used

Award Winning Company

Over its 50 year history, the company has consistently won many awards for its extensive array of products.

Some of the most recent awards include:

Why indirect evaporative cooling?

Easy to install and cost-effective to run, indirect evaporative coolers are widely chosen among facility managers and business owners.

Climate Wizard uses hyper-efficient indirect evaporative technology to deliver cost-effective cooling even in tropical and subtropical climates, where it can achieve COPs of 6 to 7, which is roughly twice as efficient as traditional reverse cycle cooling.

SUSTAINABLE

- Only water and electricity are used
- No chemical refrigerants
- Zero GWP
- Low CO₂ emissions

LOW ENERGY USE

- Up to 80% less energy compared to refrigerated air conditioning performing the same duty
- Peak energy demand reduction
- Lower running costs

IDEAL WHEN REVERSE CYCLE A/C OR VRF IS NOT AN OPTION

- For large commercial/industrial spaces
- Ideal for semi-open areas
- Improving Indoor Air Quality (IAQ)

Energy-efficient cooling solutions for a diverse range of applications

Indirect evaporative cooling is fast becoming the preferred choice for cooling large industrial and commercial buildings.

Climate Wizard indirect evaporative coolers supply 100% continuous fresh, filtered outside air with controlled humidity levels, improving ventilation rates and reducing CO2 and VOC levels to provide superior Indoor Air Quality (IAQ) for building occupants.

INDUSTRIAL

- Automotive
- Textile
- Food processing & packaging
- Warehousing

COMMERCIAL

- Retail & shops
- Restaurants
- Commercial kitchens
- Offices & educational facilities

...AND MANY MORE

- Semi-open areas
- Sport centres
- Server rooms
- Winery barrel halls

Next generation manufacturing capability

The company has no shortage of innovative ideas and advanced manufacturing improvements. Automated guided vehicles, state of-the-art robotic assembly machines and collaborative robots sharing workspaces with humans reflect the company's vision and commitment to staying ahead of the curve, meeting future market demands and delivering a total solution to all customers.

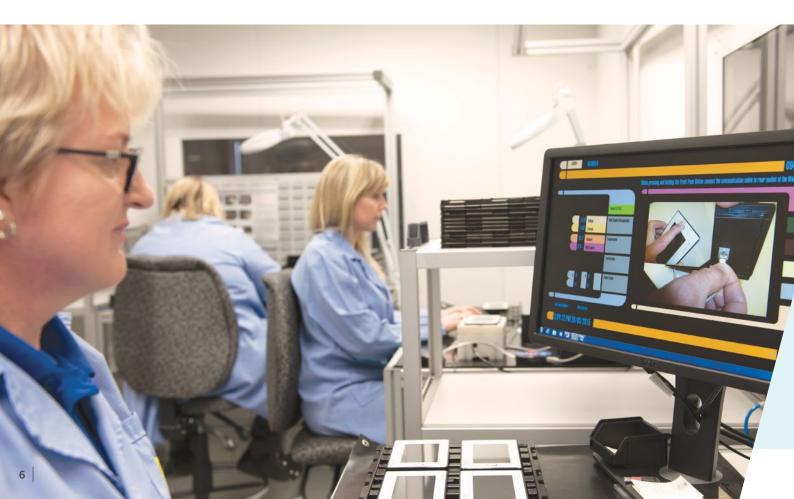

Manufacturing plants in Adelaide and Albury, Australia as well as Denver in the USA, Seeley International has the capacity to supply on scale and meet the extraordinary demands that arise in a global landscape.

Premium Quality and Durability

It's no wonder Seeley International products represent the highest quality and durability that deliver an exceptional customer experience. In its state of the art R&D division, the company operates a world leading NATA Accredited Meridian Test Laboratory, thus ensuring all product performance claims meet or exceed every industry standard.

The company also puts existing and new product designs through an extensive research and testing program to ensure the highest quality and durability.

Range of products

Product Brands

Ducted evaporative air conditioning

Indirect evaporative air conditioning

Ducted evaporative air conditioning Ducted gas heating Reverse cycle air conditioning Gas wall furnaces and space heaters

Direct and indirect evaporative air conditioning Ducted gas heating Commercial gas space heating Energy recovery systems

Indirect evaporative air conditioning

Ducted evaporative air conditioning

Dual Cool[®] Patented Dual Evaporative pre-cooling products

- Evaporative air conditioning
- Indirect evaporative air conditioning
- Refrigerated air conditioning
- Gas heating

Commercial

- Evaporative air conditioning
- Indirect evaporative air conditioning
- Refrigerated air conditioning
- Industrial gas heating
- Ventilation
- Pre-cooling
- Supplementary cooling
- Hybrid systems

Supplying key customers around the world

Seeley International has provided a wide range of HVAC solutions to a diverse customer base, demonstrating the breadth of its product range, applications, capabilities, and support. These customers include well-known brands in a variety of industries, including both large scale industrial and smaller commercial installations.

The company also operates across a diverse range of industries including:

- Commercial / Industrial / Manufacturing
- Restaurants
- Retail Showrooms and Supermarkets
- Educational Facilities
- Food and Beverage Manufacturing
- Hotels, Casinos and Cinemas

- Leisure and Sporting Centres
- Plant Propagation / Greenhouses
- Printing Industry
- Telephone Exchange and Data Communications

Seeley International has developed extensive capabilities in meeting the increased demands of providing global air conditioning solutions as a result of its diverse range of customers, industries, and experience.

Case Study Valex Corp. South Korea

Valex Corp. | Climate Wizard

Site Details

Project Address Pyengtaek, South Korea

Completion Date April 2023

Equipment 2 x Climate Wizard CW-80 HiCap units

Performance

- Total Airflow: 17,000L/s
- Application: Stand alone cooling of 100% outside air to factory
- Supply Temperature: 26.3°C (Design Conditions 33.1°C DB 26.1°C WB)
- Cooling capacity: 140.0kW
- COP: 4.9

Project Results

An energy-efficient cooling solution was required for Valex Corp., a highprecision stainless steel tubing manufacturer. Two Climate Wizard CW-80 high-capacity units were installed to provide 100% outside air cooling to the factory. With highly corrosive airborne chemicals in the factory, the continuous supply of fresh outside air provides comfortable and safe working conditions for the factory staff.

Project Benefits

- Very low energy consumption when compared with equivalent capacity refrigerated system
- Provides 100% fresh outside air to displace harmful airborne chemicals
- Comfortable conditions for workers even on the hottest summer days
- Improved indoor air quality by increasing outside air supply
- No moisture added to the space while cooling the air
- Minimal servicing required

Case Study Dongbang Pharmaceutical, South Korea

Dongbang Pharmaceutical | Climate Wizard

Site Details

Project Address Hwaseong, South Korea

Completion Date April 2023

Equipment 2 x Climate Wizard CW-80 HiCap units

Performance

- Total Airflow: 17,000L/s
- Application: Stand alone cooling to machinery area
- Supply Temperature: 26.2°C (Design Conditions 33.1°C DB 26.0°C WB)
- Stand alone cooling capacity: 140.0kW
- COP: 4.9

Project Results

South Korean advanced pharmaceutical manufacturer and R&D factory, Dongbang Pharmaceutical, had no cooling for their factory, resulting in temperatures of up to 38 degrees during the summer. With minimal plantroom space and the need for an energy efficient solution, Climate Wizard's hyper-efficient cooling was chosen as the solution. The installation of two CW-80 indirect evaporative coolers provided stand alone cooling to the factory machinery area with high energy efficiency and a low installation footprint.

Project Benefits

- Very low energy consumption when compared with equivalent capacity refrigerated system
- Provides 100% fresh outside air to the factory
- Improved indoor air quality by increasing outside air supply
- No moisture added to the space while cooling the air
- Small installation footprint
- Minimal servicing required

Capitalise on the growing market for sustainable HVAC solutions
