

The Coolair CPQ 1100X series

Delivering high performance evaporative cooling
at unbelievable value

Permatuf™ corrosion-proof cabinet

The Breezair cabinet will not corrode or rust. The UV stabilised structural polymer material is the same type used to make acid baths, battery cases and some space satellite components.

Axial fan

This super powerful fan is designed to maximise performance and minimise noise. The purpose designed fans are inherently balanced, with aerofoil blades to provide energy efficient, high pressure performance.

MagIQcool™ Controller (standard)

Operate one cooler from an easy to use, wall mounted thermostat controller. The controller comes with 20 m wiring loom, that can be extended up to a maximum length of 100 m.

Advanced touch screen MagIQtouch™ Controller (optional)

The technology includes in-built Installation Wizard, making the operating process simple. Coolers are supplied with a standard 20m cable (40m cable can be supplied as optional) to operate up to 60 coolers from a single MagIQtouch controller.

MagIQtouch™ BMS Control interface (optional)

BMS interface as optional with analogue and digital inputs.

NEW!!

Black Opal™ MINI-CELL[^] Chillcel® Pads

Our revolutionary Black Opal™ Mini-Cell[^] Chillcel® pads have transformed the aesthetics of our coolers as they seamlessly blend into their surroundings; maintaining our global leading Mini-cell[^] Chillcel® pad technology, which increases surface area of the pads by 25%, dramatically multiplying cooling capacity and efficiency - BEYOND BELIEF!

NEW!!

MagIQtouch™ Wi-Fi Smart App (optional)

Now you can control your Breezair evaporative cooler remotely using your smart devices.

Syncing with the MagIQtouch™ wall controller you can:

- View the live status of your unit
- Turn the system on/off or in free-cooling mode
- Adjust temperatures and fan speeds
- Override the Program Modes

Totally enclosed motor

Breezair's fan motor is fully enclosed to international standards and excludes any moisture ingress from all sources. The advanced design is rigorously tested and completely reliable.

Non-clogging water distribution system

Breezair's non-clogging water distribution is one of the things that make it unique. The water distributor maximises cooling efficiency by supplying a continuous and balanced flow of water across the cooling pads. This is different to any other brand of evaporative coolers, which are subject to water flow variations for a number of reasons. Breezair's balanced flow ensures highest evaporation efficiency and maximum cooling.

Tornado® water pump

Designed, manufactured and tested by Seeley International, the Tornado pump epitomises reliability.

Clean and dry function

The cooler drains automatically when it's not in use, preventing algae growth and maintaining a clean cooler.

AUTOWeatherseal

The AUTOWeatherseal closes the cooler air discharge outlet automatically, thus significantly reducing natural air currents from circulating in and out of the building.

WATERManager™ system

The Breezair WATERManager ensures optimum machine life with minimum maintenance by constantly checking water quality. It senses water quality with a probe that sends a signal back to the electronic module, which then ejects some dirty water and allows fresh water to enter.
